

## CLAIMS

I claim:

1. A portable campfire in a can comprising:

a canister assembly moveable between a closed position closing an open top of the canister base assembly and an open position exposing the canister base assembly and the burners for use;

a canister base assembly that supports both the lower burner unit assembly and the attached centering ring;

an upper burner unit assembly which fits into the lower burner unit assembly; and

a lower burner unit assembly that accepts the upper burner unit assembly.

2. A portable campfire in a can comprising:

a canister assembly moveable between a closed position closing an open top of the canister base assembly and an open position exposing the canister base assembly and the burners for use;

a sealing ring incorporated into the open end of the canister assembly to assure the sealing with the canister base assembly; and

a group of catch mechanisms used to assure union with the canister base assembly.

3. A portable campfire in a can as set forth in claim 1 wherein the canister base assembly includes a sidewall, a bottom wall and an open top.

4. A portable campfire in a can as set forth in claim 1 wherein the centering ring is fixed to the canister base assembly.

5. A portable campfire in a can as set forth in claim 1 wherein the burners rest on the canister base assembly.

6. A portable campfire in a can comprising:

an upper burner unit with perforated sidewall and open top and open bottom;

a group of log support fingers mounted on the inside of the perforated sidewall;

a group of handle holes located around top and bottom of the perforated sidewall; and

a group of burner support tabs extending around and outward from the perforated sidewall.

7. A portable campfire in a can comprising:

a lower burner unit with perforated sidewall and an open top and closed bottom; and

a burner base plate affixed to form a closed bottom.

8. A portable campfire in a can as set forth in claim 1 including a barbecue grill assembly, which can be attached or removed from the upper burner unit assembly.
